

KAIHUA QIN

✉ kaihua@qin.ac 🌐 <https://qin.ac>

ACADEMIC INTERESTS

My academic interests center around designing and building decentralized systems that are secure, stable, and incentive-compatible. The inherent complexity of real-world decentralized systems, with their interdependent and interacting layers, poses a fascinating challenge in achieving this objective. My primary focus is on permissionless blockchains and decentralized finance (DeFi).

In my research, I aim to systematically measure and quantify various problems encountered in the rapidly evolving blockchain and DeFi ecosystems. I also strive to develop real-time offensive and defensive solutions by utilizing advanced program analysis techniques to enhance smart contract security. Furthermore, I intend to devise innovative financial primitives that minimize the systemic risks of DeFi. My research is informed by the fields of security, program analysis, measurement, and finance. I am also actively exploring the application of machine learning and game theory to my research pursuits.

EDUCATION

Imperial College London <i>PhD in Computer Science</i>	<i>London, United Kingdom</i> 2019 – Present
--	---

- Advisor: [Dr. Arthur Gervais](#).

Imperial College London <i>MSc in Communications and Signal Processing</i> <i>(with distinction)</i>	<i>London, United Kingdom</i> 2014 – 2015
---	--

- Advisor: [Dr. Wei Dai](#).

Southeast University <i>BE in Information Engineering</i>	<i>Nanjing, China</i> 2010 – 2014
---	--------------------------------------

- GPA 87 (top 15%).
- Mitsubishi Electric Scholarship, Excellent Award in Innovation Practice, and numerous course scholarships.

WORK EXPERIENCE

Decentralized Intelligence <i>Co-founder</i>	Switzerland 2022.12 – Present
--	----------------------------------

- <https://d23e.ch>

University of California, Berkeley <i>Visiting Researcher</i>	2022.05 – 2022.08
---	-------------------

- Host: Prof. Dawn Song

Chainlink Labs <i>Research Intern</i>	2022.02 – 2022.05
---	-------------------

- Working on order-fairness protocols.

Cisco <i>Software Engineer</i>	<i>Shanghai, China</i> 2016 – 2018
--	---------------------------------------

TEACHING EXPERIENCE

Decentralized Finance (*Voluntary Teaching Assistant*)

by Dan Boneh, Arthur Gervais, Andrew Miller,
Christine Parlour, and Dawn Song

MOOC

Autumn'21, Autumn'22

Decentralized Finance (*Teaching Assistant*)

by Arthur Gervais

Imperial College London

Spring'22

Principles of Distributed Ledgers (*Teaching Assistant*)

by Arthur Gervais

Imperial College London

Spring'20, Spring'21, Spring'22

GRANTS

- Ethereum Foundation Academic Grant. *Dynamic Analysis Framework for EVM*. with Zhe Ye, Zhun Wang, Weilin Li, Liyi Zhou, Chao Zhang, Dawn Song, and Arthur Gervais.
- Ethereum Foundation Academic Grant. *Denial-of-Service Implications of Blockchain Censorship*. with Aviv Yaish, Liyi Zhou, and Arthur Gervais.
- Ethereum Foundation Academic Grant. *Blockchain Censorship — Quantitative Analysis of Censorship on Public Blockchains*. with Anton Wahrstätter, Jens Ernstberger, Aviv Yaish, Liyi Zhou, Sebastian Steinhorst, Davor Svetinovic, Nicolas Christin, Mikołaj Barczentewicz, and Arthur Gervais.

AWARDS AND SCHOLARSHIPS

Financial Cryptography and Data Security 2023	Student Grant	2023
Ph.D. Scholarship	Full Scholarship	2019 – 2022
Meta PhD Research Fellowship	Finalist	2022
AlphaMEV Competition	Ranked the 4th	2021
Scaling Bitcoin Workshop	Subsidy	2019
Mathematical Contest in Modeling	Honorable Mention	2013
National Undergraduate Electronic Design Contest	First Prize	2013

TALKS

The Blockchain Imitation Game

PROJECTS

SwapSwap

<https://swapswap.org/>

SwapSwap is the first automated arbitrage market maker. Its mission is to promote the decentralized nature of blockchains. By automatically executing optimal routing and arbitrage while swapping crypto-assets, it can save up to an average of 90% on transaction fees. SwapSwap also helps mitigate miner extractable value competition and, as a result, strengthens blockchain consensus security.

Blockchain Workbench

<https://blockchainworkbench.com>

I design, implement, and maintain Blockchain Workbench, a blockchain online learning platform. This platform is designed to provide beginners with fundamental knowledge of blockchains and interactive solidity (the most popular language for developing smart contracts) programming exercises. Notably, Blockchain Workbench has been adopted as the primary solidity educational platform for blockchain and DeFi courses at prestigious institutions such as Imperial College London and ETH Zurich.
